What is Prescription Assistance?

With the escalating costs of medications, many low-income, uninsured people are finding it more and more difficult, if not impossible at times, to obtain prescribed medications. As a result, some people are even reducing their dosing amounts without a physician's approval or stopping their prescriptions completely.

Many pharmaceutical companies offer financial assistance with prescription needs. Free or reduced cost medications are available to people meeting income guidelines that do not have prescription insurance coverage. The programs and application process vary with each company which complicates the process for many people. Lane County Prescription Assistance can help.

This guide will provide you with options on how to access help with your prescription needs. If you have received this guide from your physician's office, then you are in luck. That means that your physician is willing to work with others in your community to assist you in applying for pharmaceutical

assistance. If you have received this guide from any other source, you will need to ask your doctor if they are willing to sign prescription assistance applications. Medications are usually provided free or for a nominal fee depending upon the company. You may also be asked to pay a small administrative fee by the program that helps with the application and refill process.

Getting Started

The first and most important thing you need to do is read this information completely. After you have read the information, you are ready to get started. To apply for prescription assistance it takes the cooperation of your physician, for signatures, additional information, or a written prescription. Please make sure your physician is willing to sign the application forms. If your physician is already involved, they will either release your medication list to their on-site staff or fax a referral form to the Lane County Prescription Provider that will be assisting you.

Helpful Websites:

This information is offered for people who know how to use a computer and the Internet or know someone that can help them access this information.

www.benefitscheckup.org

For people 55 and over. Use this website to find information about private or government programs that help with medications, rent, property taxes, heating bills, meals and other needs. Typically takes 20-30 minutes to answer the questions and view the results. It takes only 10-15 if inquiring only about medication. BenefitsCheckUp identifies programs that you should investigate further. It does not determine whether or not you shall receive benefits nor does it enroll you in any benefit programs.

www.needymeds.com

This website allows you to use their drug list to look up your medications to see if they are available through a pharmaceutical patient assistance program. Applications are available on the website, but check with your physician or on-site patient assistance staff before completing the application as they may have software that does all the work.

If you are a veteran you may be eligible for coverage through Tricare, a Department of Defense program. You may be able to get your medications at low government prices by contacting the Veterans Administration or going to their website:

www.va.gov/health_benefits.

www.destinationrx.com

This site offers information and education on drugs and alternatives and a price-comparison tool for finding the pharmacy with the best price for your medication.

www.costco.com

Did you know you can get your prescriptions through Costco without being a member? You can also check your prescription prices on their website.

www.wellpartner.com

You can check prescription prices on their website. They are a full-service, mail-order pharmacy operating out of Portland.

Other Prescription Assistance Providers

Each of the following medical groups have on-site staff to assist their patients with prescription assistance applications:

PEACEHEALTH MEDICAL GROUP

Patient Assistance Program
1162 Willamette Street
Eugene, OR 97401
687-6225

COMMUNITY HEALTH CENTERS OF LANE COUNTY— RIVERSTONE CLINIC

1640 G Street

If you are a patient of any other provider in Lane County you may be referred by your physician's office or you can contact the following service directly:

CASCADE HEALTH SOLUTIONS

Prescription Assistance
1600 H Street
Springfield, OR 97477
Client Info Line: 866-329-0514
Physician Line: 541-744-8546
lroy@cascadehealth.org

The key to gaining assistance through pharmaceutical companies is that you cannot have prescription coverage through an insurance company, although some companies are making provisions for Medicare Part D patients. You also need to fall within certain income guidelines set by each pharmaceutical company. Income levels vary from below poverty upwards to 200% above the Federal poverty guideline (see chart on page 9.) If you have determined that you may be eligible, either your doctor will refer you to a local assistance program, or you can call the toll free local information line at 866-329-0514 to set up an appointment. When you call this number please leave your name, telephone number, and what medical clinic or physician you see. Someone will call you back within 48 hours to set up an appointment. If your physician has faxed a referral form, you will automatically be contacted by a local assistance program staff member.

Medication Information

You will need a complete list of all prescriptions that your physician has prescribed and that you are presently taking. Your physician may provide a list as part of the referral process, but it is always a good idea for you to provide a complete list as you may take other medications prescribed by another physician.

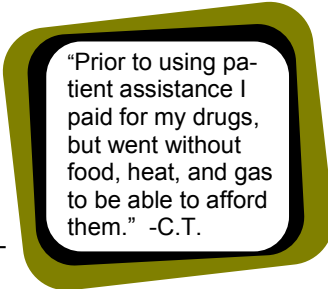

The following information will be helpful:

Name of Drug
Dosage Strength
Number of Pills per Day
Prescribing Physician
Cost for a 30-day Supply (This may be helpful for providing alternate options if your medication is not available through a free program.)

Financial Information

Since prescription assistance is based upon financial guidelines, it will be necessary for you to provide proof of income. Many of the programs require that you send copies of financial documentation with the application. Prescription assistance staff will ask you to complete an application that will detail all the important information asked by most pharmaceutical companies. You may be asked to provide this information over the phone prior to your appointment. If you are not comfortable giving out information over the phone you can request that an application be sent to you.

On the day of your appointment you will need to bring any of the following items that apply to your situation:

- Social Security Benefit Statement (SSA 1099)
- Pension Confirmation Letter or Check Stub
- Most recent Federal Income Tax Return
- Current Paycheck Stubs (last two months if employed)
- Confirmation of Unemployment
- Medicaid Denial Letter (within last 12 months)
- Medicare Card (if applicable)
- US Green card (for non-US citizens)

You will also need to provide your social security number, which is required on most applications for pharmaceutical assistance programs.

Note: If you do not bring the required documentation, this will cause delays and will lengthen the time that it will take for the application to be mailed to the pharmaceutical company. IF you do not have a copy of the above items, that apply to your situation, you will need to request a copy from the source that provided the original document.

2008 Federal Poverty Guidelines

Size of Family Unit	Income	150% Level	200% Level
1	\$10,400	\$15,600.0	\$20,800
2	\$14,000	\$21,000.0	\$28,000
3	\$17,600	\$26,400.0	\$35,200
4	\$21,200	\$31,800.0	\$42,400
5	\$24,800	\$37,200.0	\$49,600
6	\$28,400	\$42,600.0	\$56,800
7	\$32,000	\$48,000.0	\$64,000
8	\$35,600	\$53,400.0	\$71,200

If your income falls into the above categories you may qualify for help with your prescription drug(s).

Medicare Part D

If you need help understanding or signing up for Medicare Part D prescription coverage you can contact:

State Health Insurance and Benefit Association (SHIBA)

1-800-722-4134.

Medicare recipients can apply for assistance in paying the monthly premium and deductibles associated with Medicare D by completing a low-income subsidy (LIS) application available through Social Security. Go to the local Social Security office for an application or call 1-800-772-1213. An application can also be completed online at:

<https://s044a90.ssa.gov/apps6z/i1020/main.html>

Once you have met with the prescription assistance staff, provided your documentation, and signed all the paperwork, your applications will be routed to your physician for their signature and any required prescriptions. This may take a few days. When the signed applications are ready and documentation has been attached to the applications, they will be mailed to the specific pharmaceutical program for final determination. Determination takes up to four weeks.

If you are approved, you will most likely receive a letter from the pharmaceutical company telling you of your approval and that a supply of medication will be sent to your physician's office. Most companies send a 90-day supply at a time. Approval is normally for one year and then you have to reapply with new income information. Refills are handled differently by each company. Your prescription assistance staff will inform you about how refills will be ordered.

The pharmaceutical company will also inform you if your application is denied. It may be denied if information is missing, if so you can resubmit it with the proper information. If you are denied because you did not meet their income guidelines, please refer to the other low-cost options under the resources section.

Other Ways to Save Costs

There are other types of programs that may save you money. Discount drug cards can save you a percentage of the costs of your medications. Some suggested card programs are listed under the resources section.

If you cannot get your medication through a free pharmaceutical assistance program, you could ask your physician or pharmacist if they can recommend any of the following changes:

- Could a generic drug be prescribed instead of a brand?
- Could the dosage be adjusted so you can order a larger dose and cut pills in half?
- Is there a less expensive drug in the same therapeutic class?

The cost of medication can vary greatly from one pharmacy to the next. Be sure to call a few different pharmacies to find the lowest cost for your drugs. Did you know that you can use Costco pharmacy without being a member? They have very competitive prices and their mail-order pharmacy will ship without an additional charge.

There are several low-cost mail-order pharmacies that provide a 90-day supply of **generic** drugs for a low administrative cost of \$20, or \$30. See information under the resource section below.

Resources

Low Cost Generic Mail Order Pharmacies

RX Outreach

800-769-3880

www.rxoutreach.com

Call for an application and list of generic drugs available for \$20 or \$30 for a 90-supply.

Wellpartner Pharmacy in Portland, Oregon

877-935-5797 (toll-free)

Call to check prices or check online at

<http://www.wellpartner.com/main/PriceCheck.jsp>

Local low-cost pharmacy options:

Walmart and Target's \$4 generic drugs

Contact your local Walmart or Target pharmacy or download the list of available drugs from:

Walmart: www.walmart.com/catalog/catalog.gsp?cat+546834

Target: http://sites.target.com/images/pharmacy/pharmacy_4dollar_program_list.pdf

Costco's Pharmacy

541-342-5701

You do not have to be a member to use their pharmacy. They have some of the lowest prices on brand name drugs.

Drug Discount Cards

Drug discount cards are offered by for-profit or non-profit entities or pharmaceutical manufacturers which have made arrangements with pharmacies to discount certain drugs.

Together RXAccess

This card is sponsored by 12 pharmaceutical manufacturers. It is free and offers a 25-40% discount on 300+ brand-name and generic prescription drugs as well as other prescription products, such as glucose test strips. To apply, you cannot be eligible for Medicare, cannot have prescription drug coverage, and must have a household income of less than 300% of Federal poverty level. Can be used at most pharmacies. Call 1-800-444-4106 or visit: www.togetherrxaccess.com.

Pfizer's "Pfizer Pfriends"

This card offers 15-50% on 88 of Pfizer medications to individuals without prescription coverage. Enrollment is free. You must be a legal U.S. resident. Individuals earning \$30,000 or less per year, or families earning \$45,000 or less have access to greater savings. No income verification and must apply annually. To apply call 1-866-706-2400 or visit: www.pfizerhelpfulanswers.com/PP_English.pdf

Oregon Prescription Drug Program

This card is offered by the State of Oregon. Enrollment is free. You must be a resident of Oregon **and not have prescription drug coverage** (other than Medicare Part D). Call 1-800-913-4146 or download application at: www.opdp.org

Using the OPDP card offers a percentage discount depending on the drug. The greatest discount will be on generic drugs. If you have Medicare Part D coverage, you can use your card during the times you are required to pay 100% out of pocket while in the donut hole.
